Education

University of Toronto

Honours Bachelor of Science in Computer Science

Sep. 2012 – Jun. 2017

Mississauga, ON

Experience

Aerosoft Systems Inc.

Java Developer

Dec. 2019 – Jul. 2023

Mississauga, ON

- Implemented core product features and functionalities that improved user experience using Java and XSLT
- Supported client in troubleshooting and resolving issues, and raised software defects if any were found
- Authored release notes describing new features or bug fixes in each release
- Updated technical user documentation to include new features or changes to existing ones
- Integrated Robot Framework as part of CI/CD pipeline eliminating at least 8 hours of work per deployment

SAP

Quality Engineer Intern

Nov. 2017 – Dec. 2018

Toronto, ON

- Leveraged Robot Selenium test scripts to automate regression tests for legacy, web-based application
- Triaged and analyzed test results on CI/CD platform to identify, investigate, and resolve failures
- Produced solutions for automation related failures and reported application bugs uncovered by tests
- Expanded the existing test suite by over 100%
- Increased test stability from 70% stable to 100% stable

Bell Canada

Network Analyst Intern

May. 2015 – Sep. 2016

Toronto, ON

- Automated various daily hands-on processes using Bash scripts, resulting in time savings of about one hour per day while also eliminating the margin of error that existed with human data processing
- Uncovered valuable insights in customer usage trends as a result of publishing customer intelligence reports

Venture & Side Projects

Digital Hippo - Digital Asset Marketplace | *React.js, Tailwindcss, Next.js, tRPC, Payload, MongoDB*

Feb. 2024

- Developed online marketplace from scratch allowing users to buy and sell digital assets
- Implemented fully functional key features including: adding/removing items from cart, checking out cart, processing payments via Stripe integration, uploading/deleting assets to sell in seller dashboard
- Ensured responsive design for a smooth user experience on various screens and devices
- Deployed full stack implementation to Railway, and can be found at <https://digitalhippo-production-0060.up.railway.app/>

Rapid Disaster Response | *Java, Android Studio*

Aug 2018 - Dec. 2018

- Collaborated with the UN to discover how SAP's needs assessment solution would fit in with existing technologies
- Participated in the design and rapid prototyping of solution to improve needs assessment in disaster areas
- Developed front-end functionality for Android native mobile application in Java using Android Studio
- Attended investment committee meeting for SAP's 1 Billion Lives Program, finishing among the top 3 teams and received \$500,000 in funding for project

Technical Skills

Languages: HTML, CSS, JavaScript, TypeScript, MongoDB, Java, SQL, Python, XML, XSLT

Technologies/Frameworks: React.js, Node.js, Express.js, Next.js, Tailwindcss, Robot Framework, Selenium

Developer Tools: VS Code, Eclipse, Android Studio, Git, Jenkins

Achievements / Extracurricular

Jam For Good Competition Winners

Mar. 2019

- Team won mentorship from Cooperathon mentor as well as an invitation to the Cooperathon 2019 competition for proposed solution to financial illiteracy

SAP 1 Billion Lives Finalist And Funding Recipient
